

STATEMENT 10: AUSTRALIAN ACCOUNTING STANDARDS FINANCIAL STATEMENTS

This statement provides financial tables prepared on an accrual basis in accordance with applicable Australian Accounting Standards, including Australian Accounting Standard No. 31 *Financial Reporting by Governments* (AAS31), except where departures from the standard are identified in Note 1.

A reconciliation between the Australian Government's general government AAS31 and Government Finance Statistics (GFS) revenue, expenses and operating results is provided in Statement 8.

NOTES TO THE AAS31 FINANCIAL STATEMENTS

Note 1: External reporting standards

The *Charter of Budget Honesty Act 1998* requires that the budget be based on external reporting standards and that departures from applicable external reporting standards be identified.

The financial statements included in this statement have been prepared on an accrual basis in accordance with applicable Australian Accounting Standards, including Australian Accounting Standard No. 31 *Financial Reporting by Governments* (AAS31).

AAS31 requires governments to prepare accrual-based general purpose financial reports. This means that assets, liabilities, revenues and expenses are recorded in financial statements when they have their economic impact on the government, rather than when the cash flow associated with these transactions occurs. Consistent with AAS31, a statement of financial performance, a statement of financial position and a statement of cash flows have been prepared for the budget year and the three forward years.

The accounting policies in this statement are generally consistent with the accounting policies in AAS31. While the scope for financial reporting recommended in AAS31 is the whole of government (that is, the Australian Government public sector), in accordance with the *Charter of Budget Honesty Act 1998*, the budget presentation of financial estimates covers the general government sector only.

AAS31 and other relevant accounting standards would suggest the gross amount of goods and services tax (GST) be included in the Australian Government's financial statements. However, under the *Intergovernmental Agreement on the Reform of Commonwealth-State Financial Relations*, GST is collected by the Australian Taxation Office as an agent for the States and Territories, and appropriated to the States and Territories. Therefore, accrued GST revenues and associated payments to the States and Territories are not recorded in the financial statements.

Note 2(a): Consolidated Revenue Fund

The estimated and projected cash balances reflected in the statement of financial position for the Australian Government general government sector (Table 2) include the reported cash balances controlled and administered by Australian Government agencies subject to the *Financial Management and Accountability Act 1997* and the reported cash balances controlled and administered by entities, subject to the *Commonwealth Authorities and Companies Act 1997* (CAC Act), that implement public policy through the provision of primarily non-market services.

Revenues or monies raised by the Executive Government automatically form part of the Consolidated Revenue Fund by force of section 81 of the Australian Constitution. For practical purposes, total Australian Government general government sector cash, less cash controlled and administered by CAC Act entities, plus special public monies, represents the Consolidated Revenue Fund referred to in section 81 of the Australian Constitution. On this basis, the balance of the Consolidated Revenue Fund is shown below.

	Estimates		Projections		
	2003-04 \$m	2004-05 \$m	2005-06 \$m	2006-07 \$m	2007-08 \$m
Total general government sector cash (Statement 10)	1,607	1,553	1,492	1,315	982

Total grants	36,189	39,378	39,426	40,602	42,441

Note 11: Government securities

For 2004-05 and the forward years, transactions relating to debt management activities have been netted in the statement of financial position and cash flows. In the statement of financial position, the *financial assets – investments* category excludes financial assets acquired for debt management purposes, while the *debt – government securities* category is shown net of financial assets acquired for debt management purposes. In the statement of cash flows, the *investing activities – cash used/received – other* categories exclude cash used to acquire/redeem financial assets for debt management purposes, while the *financing activities – cash used – net repayments of borrowings* category is shown net of these amounts.

This netting treatment has been applied because of the uncertainty associated with the actual split between government securities and financial assets acquired for debt management purposes.

(a) This table includes estimates of ASL provided by general government sector agencies. ASL figures reflect the average number of employees receiving salary or wages over the financial year, with adjustments for casual and part-time staff, to show the full-time equivalent. This also includes non-uniformed staff and overseas personnel.
