NOTES

(a) The following definitions are used in the MYEFO:

- 'real' means adjusted for the effect of inflation;
- real growth in expenses is measured by the non-farm Gross Domestic Product (GDP) deflator;
- one billion is equal to one thousand million; and
- the budget year refers to 2007-08, while the forward years refer to 2008-09, 2009-10 and 2010-11.

(b) Figures in tables and generally in the text have been rounded. Discrepancies in tables between totals and sums of components are due to rounding:

- estimates under \$100,000 are rounded to the nearest thousand;
- estimates \$100,000 and over are generally rounded to the nearest tenth of a million;
- estimates midway between rounding points are rounded up; and
- the percentage changes in statistical tables are calculated using unrounded data.

(c) For the budget balance, a negative sign indicates a deficit while no sign indicates a surplus.

(d) The following notations are used:

*	The nature of this measure is such that a reliable estimate cannot be provided.
